

THE CANADIAN
PENSION COMMISSION

OTTAWA, January 27th, 1947.

Mr. J. N. G. F. Krouac, D-127848,
Guest House,
NORANDA - P. Q.

Dear Sir:

I am directed to inform you that the Commissioners have granted you entitlement in respect of dermatitis and bronchitis.

According to the reports of the examination held on you, your disability resulting from the condition is 20% in extent. Pension is, therefore, being awarded you at this rate.

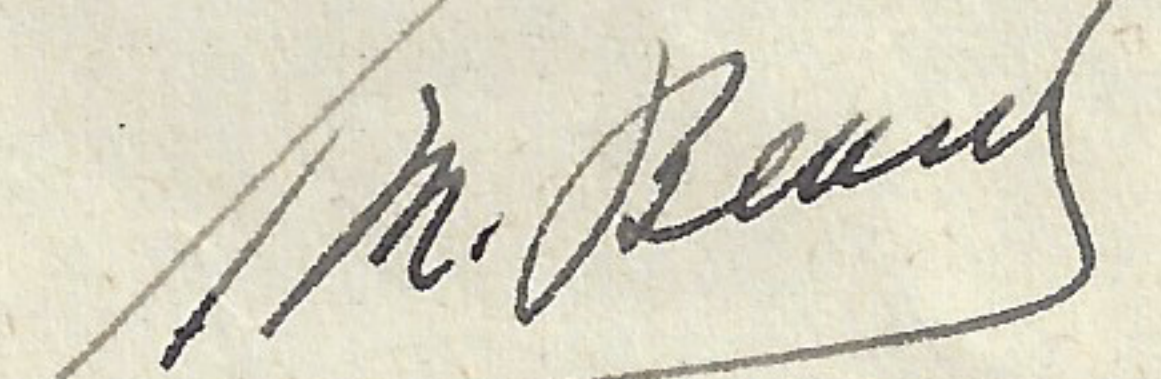

The Chief Treasury Officer will send you a statement of your account. As pensions are payable monthly in arrears, you will receive your cheques on or about the last day of each month.

I am sure you will readily understand that a little time must elapse between the writing of this letter and the adjustment of your account by the Chief Treasury Officer. In the event that you are at present undergoing treatment and in receipt of hospital allowances, your pension will not start until the termination of treatment.

I should, perhaps, point out that disabilities for pension purposes are assessed on a percentage scale and the financial circumstances and occupation of a pensioner prior to his enlistment and subsequent to his discharge have no bearing on the assessment of his disability or on his pension rate. The pension rate depends entirely on the percentage of service disablement found on medical examination.

Section 24(4) of the Pension Act provides that no deduction shall be made from a pension owing to the pensioner having undertaken work or perfected himself in some form of industry

Yours faithfully,

for W. E. Dexter,
Secretary.
